

MagLev Company Brazil

OPEN
INNOVATION

LET'S DO BUSINESS

The MagLev Company Brazil seeks investors to leverage the entry of levitation transportation technology into the market.

Spin Off

We are a new technology company. Working with Superconducting Magnetic Levitation (SML).

Innovative Ideas

SML is totally different from the other levitation methods. There is potential for market in every city in the world.

Smart Management

Our team is building a chain of suppliers and strategic partners to raise the company's value to the top.

**Cities, Urban transportation, Touristic transportation,
Airports, Commercial developments, Thematic parks**

In order to build the first commercial runway with a length of 2 km, we are raising funds in exchange for shares in the company. This external showcase will be the first commercial runway with this technology in the world.
